SUBJECT INDEX¹

The subject index for 1959 has been prepared under the handicaps incident to the transfer of editorial responsibility well after the year was begun. With time thus curtailed, it was not possible to institute in 1959 many systematic changes seen as desirable. We need the help of users in the rather complete overhauling that the index, after years of service, now needs. Specifically we need to know by what "names" psychologists look up information in an index. If you are interested in children "held back" in school, under what caption would you look in the index: School failure? Academic retardation? Nonpromotion? Even if the categorization your "name" implies is eventually found to be unacceptable, we need to know about it in order to construct an index that will lead you to the information you seek. We thus issue the appeal: *Whenever you find it difficult to retrieve information stored in Psychological Abstracts, please let us know the nature of your difficulty. Send us a postcard before the matter loses its freshness for you. Address: Psychological Abstracts; 1945 North High Street; Columbus 10, Ohio.*
